### Phentermine is commonly prescribed appetite suppressant

Phentermine is used as part of a short-term plan, for weight reduction. It is used in obese patients who have not been able to lose weight with diet and exercise alone. Phentermine belongs to the group of medicines known as appetite suppressants.

### Dosage prescribed by doctors

Your doctor will tell you how much medicine to use. Do not use more than directed. This medicine is not for long-term use. To avoid trouble sleeping, always take this medicine in the morning and never at bedtime or late in the evening.

### Phentermine assists in portion control

Ⓜ Taking just a few (about four) licks of the lollipop when the feeling of hunger arises, can suppress your appetite. This is best used when trying to balance calories to achieve the desired weight.
